DESCRIPTORS: *Nozzles, *Marine propellers,
Model tests

This report presents in condensed form the results of
experimental investigation of three- and four-bladed
propellers in nozzles. The experiments included nine
nozzles of different form and various length-diameter
ratios. Propellers having different pitch- and disc-
area ratios were used. The diameter of propellers
was 200 mm. The results of the experiments are pre-
sented in form of performance characteristics curves.
